

Quality Policy

Beldam Crossley Limited has a proud history, the origins of which date back to 1876. During that time we have achieved an unrivalled reputation for the design and manufacture of Seals, Gaskets, Jointing, Gland Packing's, Obturators, PTFE Slide Bearings and Skid-way Plates, high temperature Flexible Seals, Rubber and PTFE components and Over-braided products.

We service customers from around the world in industries such as Aerospace, Chemical, Water, Oil, Food, general engineering, offshore and Marine.

To ensure we continue to thrive as a business, it is our policy to provide and deliver consistent, high quality products on time and to meet, or exceed, specified customer requirements, whilst also meeting our obligations to statutory and regulatory requirements.

Top management are committed to driving continual improvement based upon strategic direction, reliable business processes, best practices and customer feedback, taking into account organizational context, interested parties needs and expectations and risks and opportunities.

Beldam Crossley Ltd operates a documented Quality Management System that complies with AS9100 / ISO9001 that ensures a systematic and disciplined approach by all employees.

Top management have assigned responsibility throughout the organisation for implementing and maintaining the Quality System procedures, policies and processes and ensure the availability of appropriate resources, as required, to enable the company to meet its quality objectives. These nominated authorities continually review the management systems performance and adequacy with regards potential improvement.

All employees are made aware of the aims and objectives of the Quality Management System and associated documentation and are expected to adhere to these requirements. Participation from our staff is encouraged to offer suggestions to aid in the continual improvement of our Quality Management System.

As appropriate, customers, visitors and contractors are required to acknowledge and adhere to the company's Quality Policy and related procedures.

The Quality Policy is communicated via company notice boards, staff induction and training. It is available to any other interested party through the company website and is also available upon request.

This policy will be regularly reviewed to ensure alignment with the company strategy.
